Abstract (en)

[origin: EP1942245A1] The assembly has a motorized actuator (ACT) that is provided with a wireless control command receiving unit (RCU). An autonomous power supply assembly (PWU) includes a rechargeable accumulator and a power supply connector (PR) provides connection to the actuator via an electric connection line. Power is supplied to the actuator by energy of the accumulator through the electric connection line. The power supply assembly includes a man-machine interface (MMI) with activation that allows transmission of information to the actuator. An independent claim is also included for an installation comprising a screen (SCR) and an actuation assembly.
