Abstract (en)

[origin: WO2007053248A1] A process for cooking a food while minimizing acrylamide formation in the food is provided. A dry protein mixture, a dry alkaline protein mixture, an aqueous alkaline protein mixture or an aqueous acidic protein is added to a food prior to cooking. The dry protein mixture, dry alkaline protein mixture, aqueous alkaline protein mixture and aqueous acidic protein solution comprise myofibrillar proteins and sarcoplasmic proteins substantially free of myofibrils and sarcomeres.
