Abstract (en)
[origin: EP1775050A1] The set has a set of lids (12) decorated with a pattern (38) e.g. logo, and a set of middles (10), where each lid and middle define respective supporting surfaces interacting with each other and constitute screws and nuts respectively. The screws and the nuts have helicoidal threads and helicoidal necks respectively that form helicoidal contact surfaces that interact with each other. The middles and lids comprise reference axes (A`, A`, A``, A``) taking a relative position that is single for the set, when the surface of one of the lids contacts with the surface of one of the middles. An independent claim is also included for a method for manufacturing a set of watch cases.
