Abstract (en)
[origin: DE102005052048B3] The sliding roof section has a movable cover element to close a roof aperture partly or completely. It includes at least first and second roof elements (22, 24) one behind the other in the closed position, and movable in the longitudinal direction of the vehicle. On opening, the first roof element retracts into a receiving sector of the second roof element.
