Abstract (en)
[origin: FR2891535A1] The installation (1) has a platform (5) for accessing a level (P1) and an upper level (P2). The access to the level (P2) is secured by a door (11). A safety device (13) opens the door when the platform has attained the level (P2) and locks the platform in position, when the door is in open state. The device has a self-locking interconnection mechanism with a platform locking part, a door locking part and an interconnection part between the platform and the door.
