Abstract (en)  
[origin: WO2007048623A1] The invention relates to a sensor device (1) in a motor vehicle for generating an electrical output signal (8) in accordance with a light (L) that impinges the motor vehicle. Said sensor device (1) comprises at least one photosensitive sensor (2) which selectively detects the emitted light (2), at least two different wavelengths (10, 11, 12) of the light (L) being detectable by means of the sensor (2).
