Abstract (en)

[origin: FR2892885A1] The method involves listing all fonts or font portions stored by a mobile telephone (10). A management parameter is matched with each of the fonts using a font data-base (14) such as memory. A set of font management commands is transmitted in a multimedia data flow, where the font management commands comprise a font transmission command, font updating command and font suppression command. Independent claims are also included for the following: (1) a computer program product stored in a medium readable by a computer and executed by a microprocessor comprising program code instructions for implementing a font management method (2) a radio communication terminal receiving fonts for restituting contents.
