Abstract (en)

[origin: EP1943924A2] The pull-out mechanism (3) includes a body rail (4) and a second rail (5), which can be fitted to the pull-out drawer. The pull-out mechanism also includes a pivoted lever (11), which is pivoted to the end part of the drawer rail (5) which is located inside the piece of furniture or kitchen unit. The mechanism is so arranged that the pivoted lever is able to run into the body rail and thus form an extension of the drawer rail.
