Abstract (en)
[origin: EP1944027A1] A pharmaceutical composition for treatment of nephritis of the present invention comprises a triprenylphenol compound as an active substance, preferably the triprenylphenol compound represented by the following general formula (1) as an active substance, and further preferably orniplabin represented as n=3 in the following general formula (1) as an active substance. general formula (1) (in formula (1) n is one of integer selected from 1 to 10). Further a manufacturing method of a pharmaceutical composition for treatment or prevention of nephritis of the present invention comprises using a triprenylphenol compound as an active substance.
