Abstract (en)  
This invention relates to a road element for influencing the behaviour of the road user, for instance a road obstacle, where said road element comprises a road print (104) being a perspective projection of a three-dimensional road element (103), where said road print is optimized for a viewer (101) within a given position from said road print, where said road print is placed upon or integrated into the surface of the road or in close proximity to the road. The present invention further relates to a method for manufacturing a road element for influencing the behavior of a road user and to a method for reducing the speed of a vehicle on a road.
