Abstract (en)

[origin: EP1944448A1] Fastening device (1) has a base (2) which is connectible at the part of the building, e.g. a window and a tiltable flap or a door, by a connector (3) whereby base is designed to intake (7) using connector. Base and connector are provided with fixing holes (12,13) which are used for intake to base and connector. Base and connector are fixable by application of fixing material (21) at connector.
