Abstract (en)

[origin: WO2007048446A1] The present invention relates to a method of filling a reservoir (2) which is mounted to or part of a device, with a liquid, comprising positioning a tank (7) which contains the liquid to be filled and the reservoir (2) to be filled in such a position that the liquid level in the tank (7) is at the same height or below the maximum filling level of the reservoir (2) to be filled, providing a connection between the tank (7) and the reservoir (2) in a position which enables a flow of the liquid from the tank (7) into the reservoir (2) and initiating said flow of the liquid from the tank (7) to the reservoir (2) through the connection. Moreover the present invention relates to a device for cleaning/treatment and a filling station, which are specifically adapted for use in the above method.
