Abstract (en)

[origin: WO2007054314A1] According to an exemplary embodiment of the present invention, a fire protection system for reducing the danger of fire is provided, which has a fuel cell for producing a nitrogen-enriched cathode exhaust air. The fuel cell is supplied with air and a fuel. Within the fuel cell, the air is then reduced to a determined oxygen content. The exhaust air is supplied to the room to be protected.
