Abstract (en)

[origin: WO2007048531A1] The invention relates to a fastening element (1) for fastening in a through-hole in a plate with access from one side. The fastening element (1) has a sleeve (2) and an expanding screw (3) which can be screwed into the sleeve (2) in order to expand the latter. A tool receptacle (9) for applying a screwdriver is provided on an end of the expanding screw (3) that is accessible through the sleeve (2). Furthermore, the invention relates to a setting tool and a removal tool for the fastening element (1).
