Abstract (en)

[origin: DE102005052029A1] A device for traffic lane control and warning, especially a motor vehicle lane control system, includes a control unit (6) connected to a lane control system (3) via data link and/or signal link, and the control unit receives a signal from the lane control system concerning the immediate activation state and/or the availability state. An independent claim is given for a method for control and warning.
