Abstract (en)  
[origin: WO2007055651A1] A container in the form of a receptacle and removable lid (3) for closing and exposing a storage space for a product, with the lid being of the clamp-fit type with a closing part (46) and a collar (19) that encloses the opening edge of the receptacle and projects downwards with the opening edge (6) of the receptacle having a circular flange (13) and with the collar on the lid being made of a flexible plastic material. In the lid's fastening position, a circular locking device (32), that projects radially inward and faces toward the flange on the receptacle, projects below the flange and makes contact with a lower surface of the flange. The locking device is designed with passages (28) for releasing air from the inside of the container to the surroundings when the lid is applied. The invention also relates to a method for applying the lid.
