Abstract (en)
[origin: EP1946665A1] The invention relates to a dismantlable shoe comprising two parts (1 and 2) which are independent of each other, but which can be fixed to one another using press-fastening elements (7 and 8) which can be combined with other fixing elements (9 and 10) such as Velcro strips. One of the aforementioned parts (1) comprises the corresponding sole (3) and the upper (4) of the shoe, while the other part (2) forms the heel (5) together with an insole comprising an integrated shank (6). The above-mentioned fastening elements (7 and 8) which are used to fix the two parts (1 and 2) to one another are provided on the sole (3) and on the insole (6), preferably at the waist of such elements.
