Abstract (en)

The present invention relates to a single lace boot (2) with multiple compression zones. In one embodiment, the present invention is a boot having a first side (48) and a second side (46) opposing the first side. The boot also has an upper zone (4) located near a top portion of the first side and the second side, a middle zone (6) located below the upper zone, and a lower zone (8) located below the middle zone. Furthermore, the boot has a plurality of lacing mechanisms located on the first side and the second side and a single lace (12) with a first end (54) secured to one of the plurality of lacing mechanisms in the upper zone and a second end (50) secured to one of the plurality of lacing mechanisms in the lower zone.
