Abstract (en)

The present invention relates to a mass transportation vehicle containing a passenger compartment (4) and rolling on a pair of rails (11,12) along a first edge of an existing road. This mass transportation vehicles can proceed above other vehicles thanks to its carrier legs (8), a rail (12) laid specially for the vehicle on a second edge of the road and a rig way (14), so that it can roll without being affected from the existing traffic and without interfering to other vehicles around it.
