Abstract (en)

Producing a coated textile, comprises treating a textile substrate with an aqueous dye liquor containing at least one solid material in particulate form having average particle diameter of 1-500 nm, at least one hydrophobic polymer, at least one condensation product of at least one amino group containing compound and at least one aldehyde or di-aldehyde and optionally at least one alcohol. Independent claims are included for: (1) the textile treated by the method; and (2) the aqueous dye liquor.
