Abstract (en)

[origin: EP1947260A2] A securing device comprises an angle-piece with support-limb for mounting on a bottom roof covering element (1), at least one fixture element for fixing the angle-piece on to sub-structure, and a clamping limb which can be brought into latching engagement with a clamping support formed on a lower face of an upper roof covering element (1'') overlapping the lower roof covering element (1). An independent claim is given for an arrangement for covering especially a sloping or vertical roof sub-structure.
