Abstract (en)
[origin: EP1947274A1] Drive arrangement comprises a moving coupling device (11) arranged between a drive unit (7) and a connecting rod (9). The coupling device is arranged in a first position for interlocking between the drive unit and the connecting rod and in a second position for unlocking the connection. The coupling device has an adjusting unit connected to the drive unit. Preferred Features: The coupling device has a catch fixed to the connecting rod and a drive element which can be moved by the adjusting unit into or from the moving region of the catch.
