Abstract (en)

[origin: EP1947326A1] System for starting an internal combustion engine, in particular the engine of a vehicle, comprising: a starting motor (4) able to start said engine; a first electric circuit (2) able to supply power to said starting motor; a control relay (7) that, when powered by a second electric circuit, is able to close said first circuit or, when not powered, to open said first circuit; a second electric circuit (8) able to supply power to said control relay only when the engine is not running. Vehicle equipped with said system.
