Abstract (en)
[origin: WO2007048689A1] The invention relates to a level control system for a motor vehicle composed of a gas spring (1), a connecting line (3) which connects the gas spring (1) to an atmospheric connection (5), and a first valve (2) which blocks the connecting line (3) in a first switching state and opens said connecting line (3) in a second switching state, wherein a tank (4) is arranged in the connecting line (3) between the first valve (2) and the atmospheric connection (5).
