Abstract (en)

[origin: WO2007057533A1] A multi-metal powder, in particular for producing diamond tools comprises iron copper, cobalt and molybdenum whose contents are expressed in the following mass percentages: Fe + Cu + Co + Mo = 98 mass %, the rest being oxygen and production impurities, wherein 15 % = Cu = 35 %, 0,03 = Mo / (Co + Fe + Mo) = 0,10, - Fe / Co = 2. A sintered compact is obtained by hot compaction of said multi-metal powder, for example, in the form of a diamond cutting tool.
