Abstract (en)  
[origin: GB2432171A] A building panel assembly comprises a translucent panel 2 and a spacer 4 to bridge the gap between the translucent panel 2 and a support such as a purlin 3. The spacer 4 is not pre-attached to the translucent panel 2 but is coupled on site to the purlin 3 using a magnetic effect. In this way the spacer is conveniently held in place on the purlin whilst the translucent panel is aligned and then fixed in place using a fixing pin 5.
