Abstract (en)

[origin: EP1950017A1] The mixer drum (5') has two drum end (10,11) that are provided with a filling in opening or a discharge opening (13). An extended mixer spiral (20') is provided in the direction of a longitudinal axis (A) of a drum housing (15). An individual spiral segment (30') of the mixer spiral is formed as plane circle sector section. The spiral segment or the wear protection is with plastic, particularly polyurethane. An independent claim is also included for a concrete mixer truck, which has a frame and a mixer drum.
