Abstract (en)

The container has an opening (6) in a wall (2), and a reinforcing unit (3) attached to the wall, where the reinforcement unit overlies on opposite edges (7) of the container, and is fixed and laminarily connected to the exterior of the container. The wall with the reinforcement unit forms a base of the container, where the container is formed from a web of a flexible material i.e. weldable plastic. The reinforcement unit has supports (5), which are sealingly closable and are attached at the opening in the wall. An independent claim is also included for a method for manufacturing a container from a web of flexible material i.e. weldable plastic.

Abstract (de)

Ein aus einer flexiblen Materialbahn aus schweißbarem Kunststoff gebildeter Behälter (1) weist ein Aussteifungselement (3) für die mit einer Öffnung (6) versehene Wand (2) auf, das an der Außenseite des Behälters (1) fixiert ist.
