Abstract (en)
[origin: EP1950152A2] The coupling piece has a housing (10), and a locking bolt (11) rotatably supported at the housing, where the housing has two housing halves that are detachably connected with each other and are assembled at a separation plane. The housing halves are detachably connected through a longitudinal unit that runs parallel to the separation plane and/or to a longitudinal center axis (17) of the locking bolt. One of the housing halves has a projection (22) provided opposite to the separation plane.
