Abstract (en)

[origin: EP1950159A1] Stacking arrangement (1) comprises a number of stacked sections (4) each having one or more flat objects. The edges of the objects lie over each other in the stacked sections which are displaced relative to each other across the stacking height (H) and across the edges so that the edges protrude from the arrangement in alternating stacked sections. Independent claims are also included for the following: (1) Method for the production of a stacking arrangement; and (2) Device for producing the stacking arrangement. Preferred Features: End plates (6) are arranged on the front sides of the arrangement and have a shape and size which is larger than the shape and size of the flat objects.
