Abstract (en)

The invention relates to an improved closure device for furniture doors, consisting of two L-shaped parts (1 and 2). According to the invention, one of the sides of the aforementioned parts is equipped with means (3) for fixing same to the surfaces of the leaf or wall of the piece of furniture, while the other side of each part is equipped with means for coupling the two parts to one another, said means consisting of a clamp or housing (4) on part 2 and a support (5) for rollers (6) on part 1, whereby said roller (6) can be inserted into the housing (4).
