Abstract (en)

An image processing apparatus includes a compressed-feature extractor configured to extract a compressed feature from image data, the compressed feature being a feature having a less amount of data than the image data; a display controller configured to display the compressed feature; a processing-information determining unit configured to determine processing that is to be executed on the image data and to output processing information representing the processing; and a recorder configured to record the processing information on a recording medium in association with a processing feature, the processing feature being a specific feature of the image data on which the processing represented by the processing information is to be executed.
