Abstract (en)
The terminal has a connection zone constituted of a metallic enveloping part (9), which defines cylindrical ducts (11) for receiving electrical conducting cables to be connected. The enveloping part permits to trap and guide the conducting cables inside the cylindrical ducts by a U-shaped elastic metal strip (10), which is activated by a control lever (8) to free passage of the cables. The control lever is fixed to a frame (5) of an electrical socket.

Abstract (fr)
Borne de connexion automatique composée d'une zone de connexion constituée par une pièce enveloppante métallique (9), laquelle détermine des conduits cylindriques (11) dans lesquels il est possible d'emprisonner des câbles conducteurs électriques à connecter, au moyen d'un feuillard métallique élastique (10) qui est susceptible d'être actionné par un levier (8) de commande.
