Abstract (en)  
[origin: WO2007057419A1] Apparatus (10) for ironing comprising at least a supporting structure (12) and an ironing board (11) having a central zone provided with two lateral edges, and pivoted to the supporting structure (12) to allow the apparatus for ironing (10) to be configured in at least a first operating condition wherein the ironing board (11) is substantially horizontal, and a second inactive condition, wherein the ironing board (11) is substantially adjacent to the supporting structure (12). The supporting structure (12) comprises a substantially horizontal supporting base (21), and two uprights (22) able to be selectively regulated in height, disposed substantially vertical and attached at the lower part in stable manner on the supporting base (21). The two uprights (22) each have the upper part pivoted to pivoting elements (20) disposed on the lateral edges of the central zone of the ironing board (11).
