Abstract (en)  
[origin: WO2007054166A1] The invention relates to an ice dispensing system for a refrigerated cabinet (10) comprising an ice bin (19) for holding pieces of ice, a delivery member (24,26) for feeding said pieces to an ice bin outlet (20) and activating means for activating said feeding. Further, an ice bin gate (22) is positioned at the ice bin outlet so as to control the pass of ice pieces through said outlet (20).
