Abstract (en)
[origin: WO2007048578A2] The invention relates to a refrigerator comprising a receptacle for chilled material which accommodates a vertical separating plate on the rear face thereof. Said separating plate is joined to the receptacle for the chilled material and in the area of the upper edge thereof via at least one fixture. At least one receiving zone, in which the at least one fixture of the separating plate can be hanged, is molded onto the receptacle for the chilled material.
