Abstract (en)

[origin: WO2007057343A1] The invention relates to an apparatus for testing the reading reliability of smart labels (3), having a reader (6), a transport device (2) arranged at a distance from the reader (6), for receiving and transporting the smart labels (3), and a device for setting the transmission power of the reader (6), the reader (6) having a reader antenna (7) whose distance (d) from the transport device (2) can be altered.
