Abstract (en)

[origin: EP1952851A1] The assembly has a sliding board (3) with an elongated shape along a longitudinal axis (5), and a thread insert fixing left foot of a user to the board along a fixation axis (20). A sliding board (4) has elongated shape along a longitudinal axis (6), and another insert fixes right foot of the user to the board (4) along a fixation axis (21). The fixation axis (20) makes an angle (beta1) with the axis (5), and the fixation axis (21) makes an angle (beta2) with the longitudinal axis (6), where the angles are oriented in same direction, and one of the angles is non zero.
