Abstract (en)

[origin: EP1952852A1] The board (1) has a core (4) covered with a top assembly (10), where the assembly includes a textile layer (13) forming a decoration additional element e.g. woven fabric, arranged inside an opening (2). The element is made up of a fibrous material layer, and includes a polymeric material waterproofing layer (14) forming a seal barrier between the element and polymerized epoxy resin of a reinforcement layer (12) of the assembly. The layer (14) extends under the element to be in contact with a lower face (16) of an upper protective layer (11).
