Abstract (en)  
A powder-metering apparatus (1) for dispensing measured doses of a powder into a receiving container has a handling and positioning device (2) with a handling arm (3) designed to handle a metering device (4, 4a, 4b, 4c). The latter consists of a reservoir container (31, 31a, 31b, 31c) with a metering head (32, 32a, 32b, 32c) which has a discharge orifice (5, 6) and a flow-control element (34, 35, 36) to control the rate at which powder leaves the discharge orifice (5, 6). In particular, the powder-metering apparatus (1) is equipped with an impact device (11) designed to shock the metering device (4, 4a, 4b, 4c) with upward-directed force pulses of high intensity and short duration.
