Abstract (en)

A safety device, for closing a fizzy drink bottle, such as a bottle of a sparkling wine or the like, characterized in that said safety device comprises at least an elongated flexible element (3) having an end portion thereof coupled to a movable element of the bottle closure (2) and the other end portion thereof coupled to the bottle body (1), thereby holding the movable element near the bottle body, while preventing said movable element from being uncontrollably launched as said bottle is uncorked.
