Abstract (en)

[origin: EP1953094A1] Double-walled tank or container comprises a glass mat (31) and a fiberglass fabric (29) placed on a spacer foil in the transition region between the base and the side walls of a leakage protection lining. Preferred Features: The fiberglass fabric is arranged so that the amount of yarn running from the base to the side walls is larger than the amount of yarn running parallel to the side edges of the base.
