Abstract (en)

An actuation assembly for moving casements, of the type which comprises an outer enclosure (11, 111, 211, 311) for containing the electromechanical components for actuation (13) and the electronic components for management and control (16), comprising rain detection sensor means (24, 124, 224, 324) which are integrated on a position (25, 125, 225, 325) of the outer enclosure (11, 111, 211, 311) and are connected directly to the electronic components (16), adapted to actuate the closing movement of an associated casement (S) if the detection is positive.
