Abstract (en)
[origin: EP1953332A2] The box has a housing (1) with an inner-wall element (3), base-wall element (4), overturn-wall element (5) and outer-wall element (6). Heat damping element (28) has two separate damping bodies (29, 30) and is provided in the housing between a blind roller and the wall elements. Two damping bodies lie together along an impact area (33) over surfaces (31, 32) facing each other. The impact area is increased between the blind roller and the wall elements in an area wise manner during mounting of the box. The damping bodies are molded together in a complementary manner in the impact area.
