Abstract (en)
An air conditioning system includes: an outdoor unit; at least one indoor unit connected to the outdoor unit; a storage unit which stores a control program for controlling at least one of the outdoor unit and the indoor unit; a communication unit which communicates with an external host device; and a controller which receives an updating program for updating the control program through the communication unit and updates the control program when receiving a request for updating the control program from the external host device during execution of the control program.
