Abstract (en)

[origin: EP1953876A1] The security device has a pair of housing element (2) which is coupled for receiving a plug connector. Each of the housing elements is assigned to a connector (4) of the plug connection such that the plug connection is separated by uncoupling the housing elements. The plug connection in the connected position is protected by the pair of housing elements as the plug connection is partly accommodated in the coupled housing elements.
