Abstract (en)

[origin: WO2007046065A1] A glove (I;10) for removing detachable material from an object such as a vegetable, e.g. for removing the skin of a potato. The glove is (I;10) either knitted or twilled of at least one thread of at least one elastic, plastic material. The glove is manufactured using a method comprising the steps of providing the at least one plastic material, knitting or twilling the glove, and finally heat treating the glove to cure the texture of the glove to a predetermined surface hardness depending on the object from which detachable material is to be removed.
