Abstract (en)

[origin: WO2007063106A1] The subject of the invention is a screwdriving tool comprising: - a drive shaft; - an angle head (5) comprising an output shaft (51) whose axis of rotation (511) is approximately orthogonal to the axis of said drive shaft (4); - transmission means connecting said drive shaft (4) to said output shaft (51); - and at least one torque sensor built into said output shaft (51); said tool being characterized in that said transmission means comprise at least one intermediate gear (6) whose axis is approximately parallel to said output shaft (51) and which engages with a gear (512) designed to turn said output shaft (51), and at least one bevel coupling (2) connecting, directly or indirectly, said drive shaft (4) to said intermediate gear or gears (6).
