Abstract (en)

[origin: WO2007052102A2] The present invention provides nucleic acid molecules encoding mutant fluorescent proteins as well as proteins encoded by these nucleic acids. In addition, host-cells, stable cell lines and transgenic organisms comprising the above- referenced nucleic acid molecules are provided. The subject protein and nucleic acid compositions find use in a variety of different applications and methods, particularly for labeling of biomolecules, cells, or cell organelles.
