Abstract (en)

[origin: WO2007062742A1] The invention relates to a pump housing having means for fastening the pump to a holding face, wherein the housing has only two fastening points, wherein in each case one fastening point is situated on in each case one flange of the pump housing, and wherein the fastening points are formed either by means of a material projection which is aligned toward the holding face or by means of a flattened portion of the flange.
